

The finishing touch you never need to touch again

INTEX[®]
MILLWORK SOLUTIONS

People. Pride. Performance.

Welcome to INTEX Millwork Solutions, a company with a passion for making homes more beautiful – and homeownership more enjoyable.

Our PVC millwork is an innovative product developed by people who take great pride in their spirit of innovation, talent for fine craftsmanship, commitment to quality and dedication to creating highly satisfied customers.

We look forward to helping you bring your home's unique personality to life with PVC trim, moldings, millwork, railings, pergolas and other design elements engineered for performance, and designed for many years of lasting and distinctive beauty.

With INTEX Millwork Solutions, you can truly enjoy a finishing touch you'll never need to touch again!

INTEX[®]
MILLWORK SOLUTIONS

From imagination to creation...

For hundreds of years, beautifully crafted wood millwork has been a distinguishing characteristic of the finest homes. Whether designed by an architect or envisioned by a homeowner, these unique exterior details have traditionally been brought to life through the hands of skilled craftsman. INTEX PVC Millwork brings art and science home, with a material that replicates the natural look of wood, eliminates wood's upkeep and maintenance, and is custom crafted and delivered ready to install.

Beauty

If you can envision it, INTEX can create it. Our PVC millwork is available in a broad range of standard shapes and designs, or it can be custom crafted to your exact design requirements. From Victorian gingerbread to stately columns and moldings, to classic window and door surrounds, INTEX millwork makes it easy to express your individual sense of style.

Green

Because INTEX PVC millwork is not a wood product, it can be manufactured without impacting valuable forest resources. Our high efficiency dust collection system (shown here) allows us to capture 99+% of the PVC dust generated during the manufacturing processes. The dust is then recycled along with other PVC scrap, leaving virtually no environmental impact. And, because our products are delivered sized to fit and ready to install, no waste is created at the job site.

Maintenance Free

INTEX PVC millwork offers durability that far surpasses wood or other materials. While wood can be affected by moisture, changing temperatures, UV light and insects, INTEX PVC is just the opposite. Moisture doesn't bother our PVC, and it won't rot, swell or split like wood. INTEX PVC is bug proof, UV resistant and impervious to salt.

Paintable

The white finish of INTEX PVC millwork looks beautiful and will stay that way for many years. But, if you want to express your design ideas in color, INTEX millwork can be easily painted. Best of all, because our millwork's material composition does not absorb moisture, the paint creates a strong bond with the PVC. That enables the paint to retain its fresh look longer, and it will never peel!

Railing Systems

Stylish Surroundings

Nothing adds distinction and definition to homes and outdoor living spaces like a stylish railing. Both beautiful and functional, a railing can be stunningly elegant, classically simple or designed as a wrap-around with real curve appeal. With the variety of products and styles available from INTEX, anything is possible. Whatever you choose, you'll appreciate the INTEX commitment to perfection in every detail.

You'll also appreciate the INTEX systems approach – an advantage that takes quality, beauty and simplicity to a new level. All rails, balusters, radius curves, medallion inserts and other components are delivered precisely sized, and ready for assembly with the necessary hardware.

- ◆ Select from either the Dartmouth Extruded and Pre-finished system or the Nautilus Milled and primed System.
- ◆ Create a unique look with a choice of railing designs and balusters crafted in square, chamfered or turned designs.
- ◆ Add additional charm with newel posts in raised, recessed, fluted or flat designs, and newel caps in plain, rake or pyramidal styles.
- ◆ Meets the structural performance requirements of the International Building Code and the International Residential Code.

DARTMOUTH EXTRUDED RAIL SYSTEM

The Dartmouth Extruded Rail System offers outstanding strength in a range of beautiful standard designs. These components come pre-finished in white and carry a 10 year paint warranty.

Automatic beauty

Standard and custom turned balusters are available to compliment any design.

Add a dramatic focal point to any porch or deck with a custom radius railing.

Our computer driven equipment allows you to achieve the beauty of any complex design.

Enhance a corner nook with an architectural detail that not only looks great but provides shade and protection from the sun.

Make any outside location a relaxing retreat with a free-standing pergola.

the perfect architectural

Pergola Systems

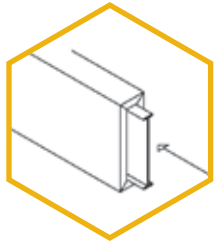

Outdoor Elegance

Whether freestanding in a garden, gracing a patio or surrounding a jacuzzi, a pergola creates a dramatic architectural statement. INTEX pergola systems are as strong as they are beautiful, and designed for a secure, easy installation – so you can enjoy your new outdoor oasis in as little as a weekend.

Exceptional Strength and Durability

INTEX cellular PVC pergola components are sleeved over structural aluminum I-beams to provide strength and durability. And, INTEX

has designed a complete bracket system for assembling components together. Bracket holes align the screws with the internal aluminum members, assuring a secure installation.

Carefree Beauty

Designed completely with maintenance-free materials, your INTEX pergola system will provide years of carefree enjoyment. Our cellular PVC rafters and carrying beams will not rot, warp, crack, or peel. The aluminum internal reinforcements and external brackets will not rust or corrode. And, the stainless steel screws and fasteners will not rust or bleed onto the structure.

statement

Column Wraps & Newels

Make a beautiful statement

Wrapped in stylish INTEX designs, newels and columns can do double duty as both vital structural components and dramatic visual elements. Homes adorned with columns and newels convey a feeling of timeless strength and beauty. Now, with the many design possibilities of INTEX column wraps and newels, you can make an architectural statement that is equally strong!

- ◆ Choose from our standard offerings, or create custom shapes and sizes including raised panels, recessed panels, flutes, applied moldings, tapered, Craftsman or Tuscan styles.
- ◆ INTEX column wraps and newel covers can be applied around existing structural members or used in stand-alone, non-structural applications.
- ◆ The INTEX column wrap and newel cover system delivers everything needed for a quick, easy and secure installation.
- ◆ Column wraps are available in standard 6,8,10 and 12-inch widths and 8,9,10 and 12-foot heights complete with mounting brackets, caps, base trim, PVC adhesive and everything needed to finish install.
- ◆ INTEX wraps can be used to make 4" x 4" posts look like 10" x 10" columns, or to accent or match other trim components.

Custom column wraps are available to meet your design requirements.

Intex column wraps are an integral part of our exterior PVC trim systems.

Tuscan style cap and base on tapered recessed column wrap.

timeless beauty

The ability to paint our column wraps and newels allows for limitless design capabilities.

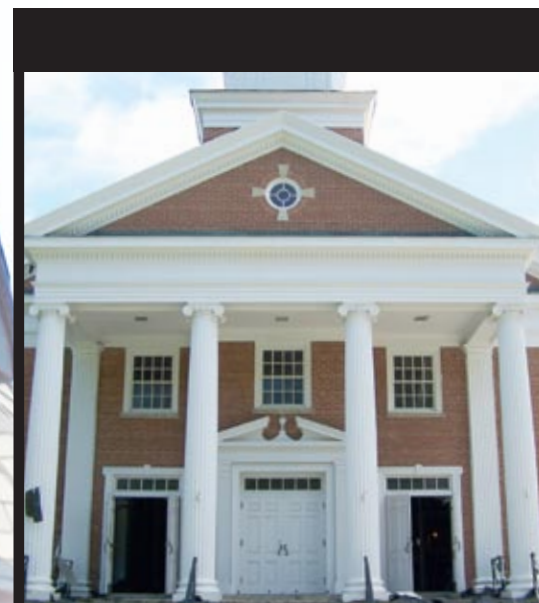

Both PVC and Aluminum components can be bent to maintain the historical look of the original design, while eliminating the maintenance

Custom lattice and panel work provides a stylish sense of security to any environment.

A couple of small accents on a prominent location on your home can give it a totally different look and street presence.

elegant details

Millwork Trim

Make every detail count.

A home isn't finished until it's dressed in a style all its own. With INTEX millwork, there's no need to limit your options – or your imagination.

And, no matter what your home's exterior cladding – from vinyl, to wood, fiber cement, stone or stucco – INTEX products can be designed to perfectly blend, coordinate or accentuate your existing materials and architectural style. Explore the full line of INTEX possibilities, including door and window surrounds, mouldings, and trim in standard designs. The INTEX team can also work with you to create custom designs, or to meet historic renovation requirements.

Dress up any interior or exterior design with custom moldings and trim.

Case Study

Cherrydale Baptist Church, Arlington, Virginia

Challenge:

The once-beautiful, wood ornamentation was originally constructed out of 16 pieces of uniquely milled wood mouldings and built up with furring strips to hold the detail away from the exterior brick facade. Now badly rotted and unable to hold the flaking paint, the cornice was deemed a hazard. It needed to be replaced in some of the existing areas and matched exactly in the newly constructed sections of the church.

Solution:

INTEX Millwork Solutions was chosen to rebuild the cornice using premium cellular PVC and had the capability to rebuild the better-than-new mouldings, off-site in the INTEX shop. "This was truly a 'blue collar' solution married with the latest high-tech product," stated Jon McLaughlin of King Carpentry. "This was the first time that we incorporated Cellular PVC trim in such a dramatic way. Based on this positive experience, we plan to specify projects in a whole new way going forward."

Have it your Way! Customize it.

Whatever design you have in mind, INTEX can help you bring it to life. Our advanced CAD design technologies, state of the art fabrication equipment and skilled craftsman can create endless interior or exterior millwork elements, from intricate detailing to innovative finishing touches.
